Using the GPS to measure waypoints (latitude and longitude) and elevation
Garmin GPSMAP 76 Waterproof Handheld GPS

Have your students practice using the GPS in the classroom before you go out to the blocks by taking a waypoint in the classroom!

1. Turn on the GPS using POWER button

2. Wait 60 seconds for the unit to locate satellites.

3. Press and hold ENTER key to store current location – latitude, longitude and elevation. This is a **waypoint**.

4. Record latitude, longitude and elevation.

5. Turn GPS unit off by pressing and holding the POWER button until the screen goes blank.

**FACT:** The GPS unit needs to contact at least 4 satellites to get your location!
