What Bug Is That?

Insects belong to different groups called Orders. What Order does your insect belong to?

**One pair of wings**
- Hind wings reduced to tiny knobs

**Two pairs of wings**
- Tip of abdomen with 2-3 thread-like tails
- Front wings rigid to form protective covering for clear hind wings

**Wings covered with powdery scales**
- Mouthparts like a coiled tube

**Wings slope downwards like a roof**
- front & hind wings have similar texture

**Wings covered with hair**
- front & hind wings similar shape and size

**Sucking mouthparts that look like a beak**
- Often short, bristly antennae
- Body may look like a thorn

**Rigid front wings meet in a straight line down the back**
- Body with a narrow "waist"

**Wings held flat over abdomen**
- Last abdominal segment not enlarged
- Found in colonies

**Sucking mouthparts that look like a beak**
- Often short, bristly antennae
- Body may look like a thorn

**Antennae always short & bristly**
- Wings with many cross-veins
