Manage Your Own Forest

- We'll simulate forest management by writing up a short management plan and implementing it on individual plots of "forest."
- Who knows what will happen when we call upon the wheel of uncertainty!

Anthropocentric

regarding humankind as the central
or most important element of
existence

Ecocentric

A philosophy that claims moral values and rights for both organisms and ecological systems and processes

Biocentric

the view or belief that the rights and needs of humans are not more important than those of other living things.

- **Anthropocentric**

regarding humankind as the central or most important element of existence

- **Ecocentric**

A philosophy that claims moral values and rights for both organisms and ecological systems and processes

- **Biocentric**

the view or belief that the rights and needs of humans are not more important than those of other living things.

Coarse Woody Debris (CWD)

- Creates habitat for wildlife
- Cycles nutrients back into the ground via decomposers
- Presumably can increase fire intensity

Fire

- Burns smaller brush and saplings that can create a fire ladder to the canopy
- By removing smaller trees, the event of a natural fire is less destructive
- Reduces coarse woody debris
